ECOLOGY

ALL FORMS OF LIFE IN RELATION TO ENVIRONMENT

OFFICAL PUBLICATION OF THE

ECOLOGICAL SOCIETY OF AMERICA

VOLUME 66, 1985

Published Bimonthly at Tempe, Arizona

by the

ECOLOGICAL SOCIETY OF AMERICA

The Ecological Society of America

OFFICERS FOR 1985-1986

President: RICHARD B. ROOT, Section of Ecology and Systematics, Cornell University, Ithaca, New York 14853

Vice President: EARL E. WERNER, Kellogg Biological Station, Michigan State University, Hickory Corners, Michigan 49060

Secretary: ROBERT P. MCINTOSH, Department of Biology, University of Notre Dame, Notre Dame, Indiana 46556

Treasurer: PAUL A. COLINVAUX, Department of Zoology, Ohio State University, Columbus, Ohio 43210

Business Manager: DUNCAN T. PATTEN, Ecological Society of America, Center for Environmental Studies, Arizona State University, Tempe, Arizona 85287

AIMS

THE ECOLOGICAL SOCIETY OF AMERICA was founded in 1915 for the purpose of giving unity to the study of organisms in relation to environment, as a means of furthering interchange between persons who are approaching widely different groups of organisms from closely related points of views, for the stimulation of ecological research, and to assist the development of the utilities which may be served by ecological principles.

MEMBERSHIP

Membership is open to persons who are interested in the advancement of ecology or its applications, and to those who are engaged in any aspect of the study of organisms in relation to environment.

The following classes of membership and their annual dues for 1986 are:

Associate Members: $20.00

Active Members: $45.00

Sustaining Members: $60.00

Student Active Members: $35.00

Student Sustaining Members: $50.00

Emeritus Members: Special rates available
(contact the Business Manager for information)

Family: $10.00 (Resides in same household as member of another class)

Active, Student Active, Sustaining, and *Student Sustaining Members* receive ECOLOGY. *Sustaining* and *Student Sustaining Members* also receive ECOLOGICAL MONOGRAPHS, the quarterly journal for longer articles. Members in arrears for dues will, on payment, be supplied with back numbers for up to one year, but the journals do not hold themselves responsible for reserving back numbers in anticipation of payment of back dues.

All members receive the BULLETIN OF THE ECOLOGICAL SOCIETY OF AMERICA, issued by the Society in March, June, September, and December. It contains announcements of meetings and excursions of the society, abstracts of papers, programs, items of current interest to members, and occasional membership lists.

Associate Members do not receive ECOLOGY or ECOLOGICAL MONOGRAPHS and are not eligible for office, but may become members in any one of the above classes upon payment of the appropriate dues.

Application blanks for membership may be obtained from the Business Manager, to whom all correspondence concerning membership should be addressed. Checks accompanying membership application should be made payable to the ECOLOGICAL SOCIETY OF AMERICA.

TABLE OF CONTENTS, Volume 66, 1985

Number 1, February

Moyle, P. B., and B. Vondracek. Persistence and structure of the fish assemblage in a small California stream 1–13

Ebersole, J. P. Niche separation of two damselfish species by aggression and differential microhabitat utilization 14–20

Fulton, R. S., III. Predator-prey relationships in an estuarine littoral copepod community 21–29

Olson, R. R. The consequences of short-distance larval dispersal in a sessile marine invertebrate 30–39

Stimson, J. The effect of shading by the table coral *Acropora hyacinthus* on understory corals 40–53

Roughgarden, J., Y. Iwasa, and C. Baxter. Demographic theory for an open marine population with space-limited recruitment 54–67

Lampert, W., and B. E. Taylor. Zooplankton grazing in a eutrophic lake: implications of diel vertical migration 68–82

Turner, T. Stability of rocky intertidal surfgrass beds: persistence, preemption, and recovery 83–92

Schaffer, W. M. Order and chaos in ecological systems 93–106

Heltshe, J. F., and N. E. Forrester. Statistical evaluation of the jackknife estimate of diversity when using quadrat samples 107–111

McClain, E., M. K. Seely, N. F. Hadley, and V. Gray. Wax blooms in tenebrionid beetles of the Namib Desert: correlations with environment .. 112–118

Johnson, D. M., P. H. Crowley, R. E. Bohanan, C. N. Watson, and T. H. Martin. Competition among larval dragonflies: a field enclosure experiment 119–128

Pacala, S. W., and J. Roughgarden. Population experiments with the *Anolis* lizards of St. Maarten and St. Eustatius 129–141

Mackay, D. A. Prealighting search behavior and host plant selection by ovipositing *Euphydryas editha* butterflies 142–151

Cappuccino, N., and P. M. Kareiva. Coping with a capricious environment: a population study of a rare pierid butterfly 152–161

Murphy, M. T. Nestling Eastern Kingbird growth: effects of initial size and ambient temperature 162–170

Smith, G. W., and D. R. Johnson. Demography of a Townsend ground squirrel population in southwestern Idaho 171–178

Hodges, C. M. Bumble bee foraging: the threshold departure rule 179–187

Hodges, C. M. Bumble bee foraging: energetic consequences of using a threshold departure rule 188–197

Harder, L. D. Morphology as a predictor of flower choice by bumble bees .. 198–210

Price, M. V., and N. M. Waser. Microhabitat use by heteromyid rodents: effects of artificial seed patches 211–219

Thompson, S. D. Bipedal hopping and seed-dispersion selection by heteromyid rodents: the role of locomotion energetics 220–229

Armesto, J. J., and S. T. A. Pickett. Experiments on disturbance in old-field plant communities: impact on species richness and abundance 230–240

Kapos, V., and E. V. J. Tanner. Water relations of Jamaican upper montane rain forest trees 241–250

Brown, R. L., J. W. Ashmun, and L. F. Pitelka. Within- and between-species variation in vegetative phenology in two forest herbs 251–258

Smith, L. M., and J. A. Kadlec. Fire and herbivory in a Great Salt Lake marsh 259–265

McClaugherty, C. A., J. Pastor, J. D. Aber, and J. M. Melillo. Forest litter decomposition in relation to soil nitrogen dynamics and litter quality 266–275

Schimel, D., M. A. Stillwell, and R. G. Woodmansee. Biogeochemistry of C, N, and P in a soil catena of the shortgrass steppe 276–282

KILLINGBECK, K. T. Autumnal resorption and accretion of trace metals in gallery forest trees 283–286
LOWRANCE, R. R., R. A. LEONARD, L. E. ASMUSSEN, AND R. L. TODD. Nutrient budgets for agricultural watersheds in the Southeastern Coastal Plain 287–296
SOLLINS, P., C. A. GLASSMAN, AND C. N. DAHM. Composition and possible origin of detrital material in streams 297–299
HAYES, J. L. The predator-prey interaction of the mite *Balaustium* sp. and the pierid butterfly *Colias alexandra* 300–303
WHITE, D. W., AND E. W. STILES. The use of refractometry to estimate nutrient rewards in vertebrate-dispersed fruits 303–307
BREWER, R., AND M. T. MCCANN. Spacing in Acorn Woodpeckers 307–308
TEERI, J. A. Crassulacean acid metabolism in the winter annual *Diamorpha cymosa* (Crassulaceae) in its native habitat 308–311

NUMBER 2, APRIL

KNIGHT, R. R., AND L. L. EBERHARDT. Population dynamics of Yellowstone grizzly bears 323–334
HANSKI, I. Single-species spatial dynamics may contribute to long-term rarity and commonness 335–343
GILL, D. E. Interpreting breeding patterns from census data: a solution to the Husting dilemma 344–354
TAPER, M. L., AND T. J. CASE. Quantitative genetic models for the coevolution of character displacement 355–371
MALMQUIST, M. G. Character displacement and biogeography of the pygmy shrew in Northern Europe 372–377
GOLDSTEIN, D. L., AND K. A. NAGY. Resource utilization by desert quail: time and energy, food and water 378–387
ULTSCH, G. R., R. W. HANLEY, AND T. R. BAUMAN. Responses to anoxia during simulated hibernation in northern and southern painted turtles 388–395
MCGOVERN, M., AND C. R. TRACY. Physiological plasticity in electromorphs of blood proteins in free-ranging *Microtus ochrogaster* 396–403
HART, D. D. Causes and consequences of territoriality in a grazing stream insect 404–414
TONN, W. M. Density compensation in *Umbra-Perca* fish assemblages of northern Wisconsin lakes 415–429
RUMMEL, J. D., AND J. ROUGHGARDEN. Effects of reduced perch-height separation on competition between two *Anolis* lizards 430–444
WETHEY, D. S. Catastrophe, extinction, and species diversity: a rocky intertidal example 445–456
WETTERER, J. K., AND C. J. BISHOP. Planktivore prey selection: the reactive field volume model vs. the apparent size model 457–464
FAIRCHILD, G. W., R. L. LOWE, AND W. B. RICHARDSON. Algal periphyton growth on nutrient-diffusing substrates: an in situ bioassay 465–472
GAINES, S. D. Herbivory and between-habitat diversity: the differential effectiveness of defenses in a marine plant 473–485
DAVIDSON, D. W., D. A. SAMSON, AND R. S. INOUYE. Granivory in the Chihuahuan Desert: interactions within and between trophic levels 486–502
GOLDBERG, D. E. Effects of soil pH, competition, and seed predation on the distributions of two tree species 503–511
MEINZER, F., AND G. GOLDSTEIN. Some consequences of leaf pubescence in the Andean giant rosette plant *Espeletia timotensis* 512–520
TAYLOR, O. R., JR., AND D. W. INOUYE. Synchrony and periodicity of flowering in *Frasera speciosa* (Gentianaceae) 521–527
MCNAUGHTON, S. J., J. L. TARRANTS, M. M. MCNAUGHTON, AND R. H. DAVIS. Silica as a defense against herbivory and a growth promotor in African grasses 528–535
DOBKIN, D. S. Heterogeneity of tropical floral microclimates and the response of hummingbird flower mites 536–543

CAMPBELL, D. R. Pollinator sharing and seed set of *Stellaria pubera*: competition for pollination 544–553
CAMPBELL, D. R., AND A. F. MOTTEN. The mechanism of competition for pollination between two forest herbs 554–563
CHAPIN, F. S., III, AND G. R. SHAVER. Individualistic growth response of tundra plant species to environmental manipulations in the field 564–576
PRIMACK, R. B., P. S. ASHTON, P. CHAI, AND H. S. LEE. Growth rates and population structure of Moraceae trees in Sarawak, East Malaysia 577–588
WHITE, A. S. Presettlement regeneration patterns in a southwestern ponderosa pine stand 589–594
HOWES, B. L., J. W. H. DACEY, AND J. M. TEAL. Annual carbon mineralization and belowground production of *Spartina alterniflora* in a New England salt marsh 595–605
ZIMMERMAN, G. M., H. GOETZ, AND P. W. MIELKE, JR. Use of an improved statistical method for group comparisons to study effects of prairie fire 606–611
RITCHIE, J. C. Late-quaternary climatic and vegetational change in the lower Mackenzie Basin, Northwest Canada 612–621
DAUBENMIRE, R. The western limits of the range of the American bison 622–624
MONTAGUE, J. R., AND J. JAENIKE. Nematode parasitism in natural populations of mycophagous drosophilids 624–626
HOFFMASTER, D. K. Resource breadth in orb-weaving spiders: a tropical-temperate comparison 626–629
ROGERS, G. F. Mortality of burned *Cereus giganteus* 630–632
LIEBERMAN, M., AND D. LIEBERMAN. Simulation of growth curves from periodic increment data 632–635

NUMBER 3, JUNE

GHOLZ, H. L., R. F. FISHER, AND W. L. PRITCHETT. Nutrient dynamics in slash pine plantation ecosystems 647–659
ALPERT, P., AND W. C. OECHEL. Carbon balance limits the microdistribution of *Grimmia laevigata*, a desiccation-tolerant plant 660–669
HUPP, C. R., AND W. R. OSTERKAMP. Bottomland vegetation distribution along Passage Creek, Virginia, in relation to fluvial landforms 670–681
BROKAW, N. V. L. Gap-phase regeneration in a tropical forest 682–687
FLEMING, T. H. Coexistence of five sympatric *Piper* (Piperaceae) species in a tropical dry forest 688–700
ROGERS, R. S. Local coexistence of deciduous-forest groundlayer species growing in different seasons 701–707
PLATT, W. J., AND I. M. WEIS. An experimental study of competition among fugitive prairie plants 708–720
BRADSHAW, R. H. W., AND T. WEBB III. Relationships between contemporary pollen and vegetation data from Wisconsin and Michigan, USA 721–737
BOWMAN, W. D., AND S. W. ROBERTS. Seasonal and diurnal water relations adjustments in three evergreen chaparral shrubs 738–742
WEINER, J. Size hierarchies in experimental populations of annual plants 743–752
MARSHALL, D. L., N. L. FOWLER, AND D. A. LEVIN. Plasticity in yield components in natural populations of three species of *Sesbania* 753–761
GEBER, M. A. The relationship of plant size to self-pollination in *Mertensia ciliata* 762–772
FOSTER, S. A., AND C. H. JANSON. The relationship between seed size and establishment conditions in tropical woody plants 773–780
HOWE, H. F., E. W. SCHUPP, AND L. C. WESTLEY. Early consequences of seed dispersal for a neotropical tree (*Virola surinamensis*) 781–791
GALEN, C. Regulation of seed-set in *Polemonium viscosum*: floral scents, pollination, and resources 792–797

PIMM, S. L., M. L. ROSENZWEIG, AND W. MITCHELL. Competition and food selection: field tests of a theory 798–807
WHEELWRIGHT, N. T. Fruit size, gape width, and the diets of fruit-eating birds 808–818
JOHNSON, R. A., M. F. WILLSON, J. N. THOMPSON, AND R. I. BERTIN. Nutritional values of wild fruits and consumption by migrant frugivorous birds 819–827
RATHCKE, B. Slugs as generalist herbivores: tests of three hypotheses on plant choice 828–836
ERWIN, R. M. Foraging decisions, patch use, and seasonality in egrets (Aves: Ciconiiformes) 837–844
SMILEY, J. T. *Heliconius* caterpillar mortality during establishment on plants with and without attending ants 845–849
PARKER, M. A. Size-dependent herbivore attack and the demography of an arid grassland shrub 850–860
BLANTON, C. M., AND J. J. EWEL. Leaf-cutting ant herbivory in successional and agricultural tropical ecosystems 861–869
FAETH, S. H. Host leaf selection by leaf miners: interactions among three trophic levels 870–875
CAIN, M. L. Random search by herbivorous insects: a simulation model 876–888
WARING, R. H., AND G. B. PITMAN. Modifying lodgepole pine stands to change susceptibility to mountain pine beetle attack 889–897
BERRYMAN, A. A., B. DENNIS, K. F. RAFFA, AND N. C. STENSETH. Evolution of optimal group attack, with particular reference to bark beetles (Coleoptera: Scolytidae) 898–903
LUCK, R. F., AND H. PODOLER. Competitive exclusion of *Aphytis lingnanensis* by *A. melinus*: potential role of host size 904–913
BOWERS, M. A. Bumble bee colonization, extinction, and reproduction in subalpine meadows in northeastern Utah 914–927
MATTINGLY, D. K., AND P. A. MCCLURE. Energy allocation during lactation in cotton rats (*Sigmodon hispidus*) on a restricted diet 928–937
